ABOUT CONFERENCE

Pharmaceutical industries and academia have different approaches and goals. Pharmaceutical curriculum is mainly oriented towards the conventional needs of an industry which in turn creates a gap between industry and academia. Graduates from pharmacy programs lack adequate skills to meet all industrial needs. In addition to theoretical learning, they should have more exposure to practical experience. In today's world there is a requisite to enhance professional standards of graduates to set their wheels in motion.

This is achievable only through collaboration of industry and academia. Interaction between Academia and industry should be considered as a part of the education and industries should come forward and align the course contents with their needs. With taking proper measures we can ensure to meet industrial expectations without compromising academic goals.

With the above overview and in order to improve the situation, Shree Santkrupa College of Pharmacy, Ghogaon, is organizing a **Two Days National Conference on Pharma Tech Conclave: Industry Insights**, an initiative for bridging the gap between academia and industry. The outcome of which will be professionally competent graduates.
