Polymeric materials for targeted delivery of bioactive agents and drugs

11

Sachinkumar V. Patil*, Sardar S. Shelake[†], Shitalkumar S. Patil[†]

*Shree Santkrupa College of Pharmacy, Karad, India, [†]Ashokrao Mane College of Pharmacy, Kolhapur, India

Abstract

In recent years, the application of polymeric materials for a targeted drug-delivery system has been greatly advanced. Since polymeric materials played a crucial role in the targeted drug-delivery technology, the selection of such materials is very important in formulation and development. Polymeric materials used as components of the drug-delivery system should not be toxic and must have the desired essential properties required for such developments. Nowadays, research is much focused on the targeted drug-delivery system as it will deliver a medication to the patient with increase in the concentration in some parts of the body relative to others. Thus, such a drug-delivery system is largely founded on polymer-mediated drug delivery in order to combat the downfalls of conventional drug delivery. The selected polymeric material will bind with drugs and target specific parts of the body where there is solely diseased tissue, thereby avoiding interaction with healthy tissue. The aim of a targeted drug-delivery system is to prolong, localize, target, and have a protected drug interaction with the diseased tissue. However, for optimization in the formulation and development of a targeted drug-delivery system, selection of polymeric materials plays a significant role. Various types of polymeric materials were used for the same. Such polymeric materials will be classified as per site of targeting and properties of the polymeric materials. The present chapter intends to focus on various polymeric materials used for targeted delivery of bioactive agents and drugs.

Keywords: Polymeric materials, Targeted drug-delivery system, Bioactive agents and drugs, Drug-delivery system.

11.1 Introduction

A polymer is a large **molecule**, **macromolecule**, composed of many repeated subunits. Owing to their broad range of properties, both synthetic and natural polymers play an essential and ubiquitous role in every day of life. The term “polymer” derives from the ancient Greek word (*polus*, meaning “many, much”) and (*meros*, meaning “parts”), and refers to a **molecule** whose structure is composed of multiple repeating units, from which originate a characteristic of high **relative molecular mass** and attendant properties. The units composing polymers derive, actually or conceptually, from molecules

Various types of plant mucilage available like alginic acid, gelatin maize starch and potato starch have been used as a binder in pharmaceutical formulation. But still finding a novel binder is useful in the pharmaceutical industry for manufacturing tablets. *Lepidium sativum* was chosen for its binding property. Aspirin and ibuprofen tablets were prepared by wet granulation technique using *Lepidium sativum* as a tablet binder. The prepared tablets were evaluated for physicochemical characteristics, and the binding efficacy of the *Lepidium sativum* was compared with the standard binder mucilage polyvinyl pyrrolidone (PVP) at similar concentration (3% w/w), 27.16° to 28.45° angle of repose and 0.46–0.46% w/w friability 1.2 to 12.03 min disintegration time. Tablets at 3% w/w binder concentration showed more optimum results as tablet binder. *Lepidium sativum* was found to be useful for the preparation of uncoated tablet dosage form. *Lepidium sativum* can be an alternative binder for the pharmaceutical formulations. Abundant availability, food grade status, economic feasibility, commercial suitability and reliability make the mucilage an alternative for the existing synthetic excipients.

ABSTRACT

COVID-19 has quickly spread across the globe, becoming a pandemic. The main objective of the present study was to prepare Ayurvedic remedies of Covid -19. The novel coronavirus disease 2019 (COVID-19) is a pandemic health emergency, caused by the severe acute respiratory syndrome corona virus-2. COVID 19 the novel coronavirus enters the host cell (Human) through its surface spike proteins and then it attaches to the angiotensin-converting enzyme -2(ACE-2) receptor which is most abundant on the surface of type II alveolar cells of the lungs. The Indian system of holistic medicine is known as "Ayurveda". Ayurveda has its origin in two Sanskrit words; Ayuh meaning life and veda meaning knowledge. Ayurveda provides a basic way of living to the people. In day-to-day life, Ayurveda plays an important role in controlling the viral disease SARS-CoV-2 and other health disorders. Ayurveda therapies improve the immunity of humans. Dietary supplements, herbal therapies and herbal medicines could be a complementary preventive therapy for COVID-19(SARS-CoV-2). Some herbs show antiviral activity against coronavirus. Ayurveda has specialties such as treatments, herbs and medicines to recover covid 19:

Yoga and Rajayakshma chikitsa, etc (treatments) are discussed. Ashwagandha, Haridra, Guduchi, Tulsi, etc (herbs) used to cure. The study aims to review ancient classical literature and past human treatment protocols of Ayurveda for the prevention and treatment of infectious diseases like COVID-19.

INTRODUCTION

China has reported cases of pneumonia in Wuhan city in late December 2019 [1]. On 11 Feb 2020 World Health Organization (WHO) named pneumonia originated in Wuhan as Coronavirus Disease-2019 (COVID-19) [1,2]. The coronavirus disease (Covid -19) has challenged health care organizations across the globe. The World Health Organization (WHO) is constantly monitoring and updating the information available regarding its spread, mortality, and morbidity. The pathogen coronavirus belongs to a virus family which causes severe acute respiratory syndrome (SARS-Cov-2) [2]. COVID 19 the novel coronavirus enters the host cell (Human) through its surface spike proteins and then it attaches to the angiotensin-converting enzyme -2(ACE-2) receptor which is most abundant on the surface of type II alveolar cells of the lungs [2,3].

Clarithromycin Immediate Release Tablet

Quality cannot be assured only by doing finished product testing and in-process monitoring; it should be built into the manufacturing process. As a result, quality construction necessitates special attention to a few factors such as material selection, process design, control variables, in-process control, and finished product testing. In this study, three initial batches of Clarithromycin tablets with the same size, method, equipment, and validation criteria were taken. Various critical parameters during dry mixing, wet granulation, drying, lubrication, and compression were identified and evaluated as per the validation protocol. The results of the whole process show that process validation data gives a high level of confidence that the manufacturing process will produce a product that meets its predetermined specification and quality attributes.

About Authors

Dr. Ramling G. Patrakar M. Pharm, Ph.D. is presently working as an Associate professor and Head of the Pharmacognosy department at Shree Santkrupa College of Pharmacy, Ghogaon. He has completed his M. Pharmacy from J.S.S College of Pharmacy, Doty, Tamilnadu and Ph.D. from SRTMU, Nanded. He has more than 15 years of teaching and research experience. He has contributed 15 papers in National and International journals. He has attended more than 30 National and international conferences. He has successfully completed the course on IPR conducted by WIPO Worldwide Academy, Geneva in 2008.

Dr. Omprakash G. Bhusnure M. Pharm, Ph.D. is presently working as Professor and Head, Department of Pharmaceutical Quality Assurance at Channabasweshwar Pharmacy College, Latur. He has more than 22 years of teaching and research experience. He is presently a member of BOS and BOE at SRTMU, Nanded. He has guided a total 65 M. Pharm and 8 Ph.D. research scholars. Recently, 2 Ph.D. students have been awarded under his guidance. He has published 3 books and 93 papers in National and International journals of repute. He has also published 9 patents out of which 1 patent is granted. He has received 14 awards in poster and oral presentation in various National and International conferences. He is a life member of IPA and APTI.

Dr. Firoj A. Tamboli M. Pharm, Ph.D. is a Head, Department of Pharmacognosy, Bharati Vidyapeeth College of Pharmacy, Kolhapur, Maharashtra, India who received his Ph.D. degree in Pharmacy from the Shivaji University, Kolhapur. He has more than 22 years of teaching and research experience. He has guided a number of postgraduate students with more than sixty publications in National and International refereed journals. He has fetched many project grants from AICTE. He is having professional experience as Convener/Chief Coordinator/ Chair/ Co-chair/ Member Scientific Committee / Resource Person/ Referee to evaluate etc. in FDPs/ Conferences/Seminars/ Workshops in Pharmacy. He is a Life Member of APTI. He serves as an Editorial board member of more than 15 National and International refereed journals. He is the recipient of the Faculty of the year award, by vmedulife software services Pune, Best researcher award, by VDGODD Professional Association Doty, India.

Dr. Harinath. N. More M. Pharm, Ph.D. is a Professor and Principal at Bharati Vidyapeeth College of Pharmacy, Kolhapur, has completed his graduation, post-graduation, and Ph. D. from Bharati Vidyapeeth's Poona College of Pharmacy, University of Pune. He has 35 years of teaching experience and guided 10 Ph. D. and 61 M. Pharm. Students. He has authored nine books in the pharmacy. He has published 111 international and 41 national research papers in refereed journals. He has worked on various bodies/committees of Shivaji University, Kolhapur. He is a Member of the Academic Council, Board of Research, Chairman of Board of Studies in Pharmacy, Shivaji University, Kolhapur, and also Member of the Board of Studies for Post-graduate studies, Pharm. D. and Research (Faculty of Pharmacy), KLE Academy of Higher Education and Research, Belgavi and Member of Faculty in Pharmacy, Dr. Babasaheb Ambedkar Technological University, Lonere. He has received many Research project grants from UGC, AICTE, CSIR. He is a Life Member of various professional bodies like ISTE, APTI, ISCP. He is the recipient of Barr. P. G. Patil, Ideal Teacher Award, by Shivaji University, Kolhapur, Vocational Excellence Award, by Rotary Club of Kolhapur Heritage and Bharati Vidyapeeth, Seva Gourav Puraskar of Bharati Vidyapeeth Pune.

ABOUT THE AUTHORS

Ms. Nigar Kadar Mujawar has completed her B. Pharm and M. Pharm., and pursuing Ph.D. from Shivaji University Kolhapur. She is currently working as an Assistant Professor at the WCOP, Peth-Vadgaon, Kolhapur. She has a total of 8.5 years of teaching & administrative experience. She has five published & two grant patents in her name. She has one copyright on her name. She wrote three books & One book chapter. Won "Young Scientist Award" from Ashokrao Mane Group, Peth Vadgaon, Kolhapur. She won Winner, Runner & cash prize in a national-level poster presentation. Her research & review publications are cited as references. She is working as a reviewer of journals. Won an award as a "Motivational Personality" from Sakal Tanishka Mahila Group Kodoli, Kolhapur. "Samaj Ratn Award 2023" from Gramdevta Dainik, Shiradwad, Ichalkaranji. She continuously won three awards as "Best Faculty of the Year" in 2020, 2021 & 2022 from Vmedulife Software Services, Pune. She is a member of the MSPC & APTI.

Ms. Ashwini Rajendra Suryawanshi completed her graduation from Sri Santkrupa College of Pharmacy, Ghogaon, Karad, and her post-graduation from Government College of Pharmacy, Karad. She published 3 patents and one book chapter. She has 6 years of teaching experience. She is a member of MSPC.

Prof. (Dr.) Dhanraj Judge is an academican and administrator in the field of pharmacy having more than 28 years of research and academic experience and is currently working as Principal and Professor at Womens College of Pharmacy, Peth Vadgaon Kolhapur (Maharashtra). Dr. Judge has published research and review articles in various national and international journals and has six books and two international granted patents to his credit. He is a life member of various professional associations like APTI, IPA, and IPS. He has been associated with several Indian universities and institutes as a member of academic bodies and examiners at various levels. He is working as a reviewer and editor for national and international journals.

Dr. Jameel Ahmed S. Mulla received his Bachelor of Pharmacy (2003) and Master of Pharmacy in Pharmaceutics (2005) from Rajiv Gandhi University of Health Sciences, Karnataka, India.
